

★ Blender basics

① **Ctrl + N** ⇒ To switch between workspaces.

② **RMB** ⇒ To select a object in 3d space.

③ After selecting press 'G' to move it around freely.

↳ 'G' followed by 'X', 'Y', 'Z' will allow you to move along x, y and z direction respectively.

This changes depending on the active tool selected from Tools panel

④ After selecting press 'S' to scale the object.

↳ 'S' followed by 'X', 'Y', 'Z' will allow you to scale along x, y and z direction respectively.

⑤ **MMB + Drag** ⇒ Rotate

⑥ **Shift + MMB + Drag** ⇒ PAN

⑦ **T** ⇒ To open tools panel

⑧ **N** ⇒ To open transform panel (You also have tools and view panel with it)

⑨ **Z** ⇒ To change object view mode.

This controls the view from the camera we are looking while working

⑩ **X** ⇒ To delete an object

⑪ **Shift + O** ⇒ To duplicate an object.

⑫ **Shift + A** ⇒ To add objects into scene

3D Cursors

→ To move it 'SHIFT + RMB'

→ 'SHIFT + S' for more options related to 3d cursor.

→ In view panel you can edit the exact position and orientation of 3D cursor.
